there were "...four unique cities in the United States; Boston, New Orleans, San Francisco and San Antonio". Dr. Richter validates that notion with her well designed and conceived presentation of my fair city. For new comers, tourist and natives the work is effective at several levels as it serves as a guide for walkers, day trippers and those of us who have lived here for decades just wanting to catch up on opportunities we missed, ignored or wrote off as inconsequential. So if you have the urge to chillax and explore the inner sanctum of "Sanantone" buy this fun and very entertaining book. If not remember our place is only a 90 minute drive north on IH 35 where you can go visit our more hyperactive sibling city and contribute to keeping it (Austin) wierd. 2 of 2 people found the following review helpful.
