parks and water scenery than shopping, and thus this book was a major eye-opener. It is astonishing just how many interesting stores there are in New York, even for those who have no intention of making any purchases. New York actually has shops devoted exclusively to items as specialized or as far-out as porcelain, peanut butter, pickles, sexy lingerie, macabre oddities, sportswear, bizarre musical instruments, anti-establishment books, chopsticks, Gothic wear, sake, fountain pens, Scandinavian candies, vintage cash registers, smoked fish, magic paraphernalia and supplies for magicians, dollhouses, cheeses, chess, coffee and tea, rubber stamps, model trains, cookbooks - you name it! The only gripe, apart from some minor typos, is that the authors/editors did not see fit to include double the businesses! It is worth taking several days just to explore these shops!

I thought they were included to make the writer seem like a hipster as though they had a secret ...By StripesI felt this book was a bit disappointing 90% of the stores are already places that are well known and on the beaten path. The other 10% are funky or kinky or things that most people would not be interested in at all. I thought they were included to make the writer seem like a hipster as though they had a secret insight to places no one would be aware of if not for them. For the most part if there is not a single thing in a store that even if offered an item for free I would not take it, then the store is not worth my time especially when the city is chock full of delightful shops. I was puzzled by some of the supposed views of New York City residents that claimed they had no idea the shops existed they must not get out much. Browse through this book for free at the library.

This book has tons of information about shops that you might not know even if you lived there. There are so many shops and areas of NYC that it's not possible to know where all the great ones are, but this book can surely help find them in "the greatest city in the world" (borrowing from Hamilton!).

For the curious and adventurous this is a discovery tour full of surprises and delights. It explores reinvented hip neighborhoods, like Soho, Meatpacking District, Dumbo, Williamsburg. And the traditional, like Lower East Side, Little Italy, Harlem, Greenwich Village. This city is known the world over as a shopper's paradise. And this book brings it all to life -- 111 of the most irresistible shops in New York City!

111 Shops In New York That You Must Not Miss, which hits shelves November 15th, is a must even if you think you know every shop in the city. The usual suspects abound; Russ Daughters, The Strand, Forbidden Planet, Pearl River and Housing Works but it still makes for a great resource, especially for your out of town friends. They even included Casey's Rubber Stamps on 11th St along with a great list of obscure book and art shops, bakeries, thrift stores and a lot of fun things to do and explore in a city where there is always something new to discover no matter how cynical we get. 111 Shops in New York That You Must Not Miss: Unique Finds and Local Treasures...is a fun guide to retailers around the city, from well-known emporiums like Eataly and ABC Carpet Home, to unusual specialty shops selling books, vintage jewelry, skateboards, hats, lingerie and more.
