By lee77I don't know who is now in charge of producing these calendars, but he/she needs a lesson in astronomy, specially the symbols for phases of the moon. On this calendar, the symbol for the new moon is used to indicate the full moon and vice versa. The new moon symbol is a solid black circle, the full moon symbol is a white circle. One would think even if a person isn't familiar with these symbols, common sense would indicate which is which because white indicates light and black indicates darkness. This year's photos are fine and the numerals are dark enough they can be seen from more than 8 inches away -- unlike those on the 2015 calendar. 1 of 1 people found the following review helpful.
