Mostly a good book....By KristineThis book has very good information, but like another customer commented, getting to the hikes is one of the primary uses for a book of this type. My biggest "complaint" is about the regional map inside the front cover of the book which shows where all 60 hikes are located. The map markings, hike locations, highway and road names, etc. read left to right on the page. Unfortunately the top of the page is not geographical NORTH as one is accustomed to seeing on most printed maps. The map has been printed and labeled showing east as the top of the map. If you turn the book so that NORTH is in the more familiar top position of the map, then the markings, names, etc. are rotated 90 degrees clockwise and near to impossible to read. This is really a bummer, since it is the ONLY map in the book that shows the location of all 60 hikes on one individual map. I had (but lost) the earlier edition of this book years ago and referred to the regional map often, but don't remember the map being this difficult to read. It's hard to believe the author and an editor thought this map was at all logical and easy to understand!

KraftSome of the hikes in this book are not so great, but I suppose it depends on what you're looking for. I was looking for more of the remote hikes and hidden gems you can't find on the internet. This book shows more of the state parks, state trails, and more popular places to hike. Since I already knew about most of the ones close to my house already, this book wasn't very useful for me. For someone who wants to find quick and interesting weekend hikes with higher traffic, this would be a good book.

This authoritative guide to Twin Cities hiking details 60 of the areas best trails, most of which are within an hours drive of the metro area. This second edition is completely updated and includes new trails, photos, trailhead coordinates, and updated maps. Within the seven county "metro" area that encompasses the Twin Cities of Minneapolis and St. Paul, nearly 1,000 beautiful trails lie within these urban borders. Minneapolis was recently named "the most athletic city in the nation" in the February 2006 issue of Mens Fitness and this is the only hiking guide for the Twin Cities

Praise for previous edition:"...an excellent and enthusiastically recommended planning resource for Twin Cities area hikers and outdoor enthusiasts looking for exercise, variety, and fun."--Midwest Book
