ClardyNow that I've reduced my work schedule to part-time, I have more time for fitness and exploring the many beautiful parks and trails throughout the San Francisco Bay Area. "60 Hikes in 60 Miles" allows me to research hikes before I go, to know how to get there, where to park, how accessible the trails are, how long it will take to get there, how strenuous the trail is, what to expect and how to prepare in advance. Though the guide does not cover every trail in each park, it highlights a trail that is representative of what's available at that park or location. I photocopy just the few pages of the book that relate to a particular trail instead of carrying the entire book with me on a hike. I look forward to exploring all 60 hikes !9 of 9 people found the following review helpful. Excellent hiking resource!By NoahOur edition of Jane's book is well-loved. We rely on it entirely when we are ready to hit the trail. Excited is an understatement when we heard a new edition is on the way! Bravo Jane, for hitting the nail on the head!1 of 1 people found the following review helpful. Excellent companion to the websiteBy E. McDonaldI've been a fan of Jane Huber's website, bahiker dot com, for years and finally bought her book to support her. The book compiles 60 of the hikes that are also online. I continue to use the website more when finding a hike to take, but the book is handy to bring along. It's also nice to browse through it when I'm not immediately planning a hike.

Bay Area parks and preserves offer a dramatic variety of landscapes, from rugged redwood-forested canyons to breezy coastal bluffs, grassy rolling hills to sunny chaparral-coated hillsides. Well-known destinations such as Point Reyes National Seashore, Mount Diablo State Park, Mount Tamalpais State Park, and many other more obscure jewels of the Bay Area park system are just a short drive from the heart of San Francisco. Completely updated and including several new hikes and a complete new map set, 60 Hikes within 60 Miles: San Francisco guides readers to a splendid assortment of trails in the nine counties surrounding one of the world's most beautiful cities. Whether hikers crave a quick and easy get-out-of-town stroll or a challenging day-long trek through wilderness, this book is the perfect trailblazer, for city natives and first-time visitors alike.

From the Inside FlapThe Bay Area is home to one of the richest, most hike-able landscapes in the continental U.S. There are a number of "destination parks," places where visitors from all over the world flock to walk among giant redwoods or to whale-watch. "But there are also hundreds of smaller parks unknown to most tourists and even life-long residents," Huber explains. Many of these hidden hiking gems, Huber continues, can be found right in your backyard. "Thousands of people living in the foothills of Mount Tamalpais, for example, can literally walk from their front doors all the way to the top of the mountain if they like." Huber finds the 60 best hiking spots within roughly an hour's drive from central San Francisco. By keeping its focus on the immediately local area, this new edition highlights even more of the lesser known hiking parks and open-space preserves -- especially those surrounding the Bay Area's most densely packed cities of San Jose, San Francisco, and Oakland -- while still including major tourism draws, making it perfect for city natives and visitors alike.
