**Andre Baldet : A Bicycle World: Cycle around the Globe through 101 Stunning Travel Posters** before purchasing it in order to gage whether or not it would be worth my time, and all praised A Bicycle World: Cycle around the Globe through 101 Stunning Travel Posters:

Hop on your bicycle and travel around the world with French artist Andr Baldet! Beginning in Hawaii and headed ever

eastward until ending in New Zealand, Baldet authentically captures the character and charm of world locations in 101 vibrant, full-color, bicycle-themed illustrations, from Los Angeles and Lisbon to Trinidad and Tangier. Baldet magically embeds a bicycle sometimes obviously, sometimes not in each of his original pieces in this whimsical world tour. The beautiful and clever art is sure to delight lovers of cycling, travel, and illustration.

About the Author Andr Baldet was born in the south of France. He majored in graphic art and art history while studying in Toulouse. After graduating, he spent six years travelling and teaching painting on fabric throughout North and South America, the Caribbean Islands, Western Africa, the Indian Ocean and Asia to broaden his horizons. Since 1996, he has been working in the Paris region as an illustrator, graphic designer and painter, in a variety of fields including advertising, digital imagery, art poster design and educational books for children. Travel is a recurrent theme in his artwork, and when not in his studio for an illustration assignment or preparing a painting exhibition, he is passionate about traveling the world, visiting new places, and reflecting these adventures in his work.
