Trento Salvatore Michael : A Field Guide to Mysterious Places of the West (The Pruett Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised A Field Guide to Mysterious Places of the West (The Pruett Series):

0 of 0 people found the following review helpful. I recommend this as an interesting read to anyone with an ...By CustomerAfter purchasing an item from this guy he brought to my attention the books he has authored. Ironically upon opening this book I found some hard to find information on a very obscure and isolated site that I was actively

studying and exploring at the time. This book provides some very interesting information on some lesser known archeological sites. When reading this book it is obvious that the author has personally studied and visited these areas and is not just compiling information from other sources. I recommend this as an interesting read to anyone with an interest in the subject. 7 of 7 people found the following review helpful. An excellent supplementary guide for vacationers travelers By Midwest Book Review Field Guide To Mysterious Places Of The West by archaeologist, geologist, and experienced traveler Salvatore M. Trento is an exciting and unique tour guide to an impressive series of unusual and noteworthy locations throughout the American West. Ranging from the Turtle Rock Geofoms (granite blocks of Colorado which have eroded into recognizable shapes), to sacred sites, ruins, solstice sunrise petroglyphs, and so much more, Field Guide To Mysterious Places Of The West is organized by state, and complemented with black-and-white photographs and diagrams. Field Guide To Mysterious Places Of The West is very highly recommended an excellent supplementary guide for vacationers and travelers looking to see and experience something different in their journeys throughout the American West. 7 of 7 people found the following review helpful. A extraordinary look at the mysteries that surround us By A. Cleveland I loved this book. I was excited to read the different explanations about these strange things found in nature. It is even more interesting after you have seen some of these places for yourself. I think that the photos in the book added a lot to my understanding. I would highly recommend this book to anyone who is interested in natural mysteries!

Maverick archaeologist Sal Trento guides the curious explorer to hundreds of inexplicable sites, geological and archaeological, from the Taos "Hum" to the "Winter Solstice Sunrise Petroglyphs" of Los Angeles. Profusely illustrated with BW photographs, maps, and historic drawings. Bibliography and index.
