Richard Saul Wurman, Access Press : Access Washington, D.C. before purchasing it in order to gage whether or not it would be worth my time, and all praised Access Washington, D.C.:

By Plymouth, CAI am so sorry that the Access Guides seem to be disappearing. For my first trip to Washington DC, I finally ordered the 2007 version of this book--nothing newer seems to exist--and even with such an old publication date, it proved to be much more helpful than the other guidebooks that I'd already purchased. I love the Access format because it travels through each neighborhood in the city. Each section has a map with a number that designates a hotel's, museum's, shop's, restaurant's location. And the detailed information offered about each of those places is always helpful and often quite drole. I was in a quandary about which hotel to choose in Washington--location is always the most important thing with me. Access allowed me to make that decision by showing me where the hotel was placed and what restaurants, museums, etc. were close by. Other guidebook require a map of the city and then much page turning since their format is not so consumer friendly. Most guidebooks lump all hotels together, then all shopping together, etc. (I really don't need to know about shopping or restaurants in Arlington if I'm not going to get to Arlington.) Since the publication date of this book, several restaurants near the hotel had disappeared, as had the Border's book store. But, still, I found the Access guide offering the best information in helping me to sort out where to go and what to do. I am sorry to see this publication unavailable. I've made this guidebook my first choice whenever I consider traveling somewhere new. The books are always fun to read and the best source that I've discovered for quickly making me feel grounded in a new place. Everything changes--but this is a change that will lessen my pleasure of travel. Planning is one of the more enjoyable components of travel--and I so enjoyed planning with the Access guides.

By moviewatcher I always look for an Access book when planning a trip. I like the format, set up by neighborhood, so there's no unintentional criss-crossing all over town if you find you missed something you wanted to see, only to find you'd already been in that area. Good resource for interesting comments on the architecture in the area, out of the way hotels, and restaurants.
