Eve Devereux : Cats Facts, Figures Fun before purchasing it in order to gage whether or not it would be worth my time, and all praised Cats Facts, Figures Fun:

Something special for the cat fancier! It follows the evolution of the fabulous feline, domesticated only about 6,000 years ago (dogs came on board about 100,000 years before), as well as its depiction in religion and myth. A climb up the family tree surveys the various breeds and their classifications, and there's an entertaining collection of trivia; supercatral facts, including their role as witches familiars; purry stars of page, stage, and screen; and feline-related words.
