**Gary Taber, Perry Casalino : Chicago's Fountains** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Chicago's Fountains:

Travel to Chicago's parks, squares, and gardens and see its beautiful fountains. In this collection of images by photographer Gary Taber, learn the history and story behind the creation of Chicago's fountains. Set in chronological order, see how the design of these fountains follows a pattern of design evolution similar to those in art and architecture. Starting with mostly European or Europe-trained designers, later with Chicago's local talent, and finally with many famous international designers, Chicago's fountains are world class in design and execution. Covering fountains built in the 1880's to the present, Chicago's Fountains is a journey through Chicago's lovely spaces and a

testimonial to its standing as a design leader in the world.
