Excellent 1st Person Account of the West in the Mid-19th CenturyBy RodamuRichard Burton was a prolific author who wrote many accounts of non-western cultures and explored many areas little known or unknown to Europeans. His account of a trip by stagecoach through the West just before the American Civil War is fascinating for the ordinary details of life and travel given and the interesting characters he met. His impressions of Native Americans were mostly second hand and while he was opened minded for a man of the Victorian era, he still has the mind set of that period. He was a genius and an eccentric character who lived a very adventurous and dangerous life. He enjoyed fighting and volunteered to accompany the US Army to fight some "Indians" but wasn't give the opportunity.This is not the best edition of this book; I recommend spending more

money for a properly formatted and illustrated edition.0 of 0 people found the following review helpful.
Discombombulated!!!By fans!Unfortunately this version gets very hard to follow, it gets chopped up and out of
sequence which gets very frustrating to follow, and this is unfortunate because we are talking about an incredible man
in a fantastic time of our nation's history. Meeting with and giving us his perspective. I recommend buying a better
version if available, you will not enjoy trying to decipher this version.0 of 0 people found the following review
