changed the way we see urban green, City Squares changed the way I see my city, New York, and how I remember every city square I've ever visited around the world. This wonderful book! Traveling the world with eighteen brilliant writers, including Ann Beattie, Zadie Smith, Michael Kimmelman and Andrew Roberts would be value enough, but it's also the sense of their appreciation for and interest in the significance of squares everywhere that is so enriching. The eye must travel, and it does thanks to City Squares. Last but not least, the Financial Times' Gillian Tett writing on the virtual square: Hacker Square at the mighty Facebook headquarters in California is a must-read by anyone who has ever noticed that, yes, the Internet is real and ever-expanding and ever-changing the way we regard each other in this great experiment called life, in the 21st century. 2 of 2 people found the following review helpful. In this important collection, eighteen renowned writers, including David Remnick, Zadie Smith, Rebecca Skloot, Rory Stewart, and Adam Gopnik evoke the spirit and history of some of the worlds most recognized and significant city squares, accompanied by illustrations from equally distinguished photographers. Over half of the worlds citizens now live in cities, and this number is rapidly growing. At the heart of these municipalities is the square the defining urban public space since the dawn of democracy in Ancient Greece. Each square stands for a larger theme in history: cultural, geopolitical, anthropological, or architectural, and each of the eighteen luminary writers has contributed his or her own innate talent, prodigious research, and local knowledge. Divided into three parts: Culture, Geopolitics, History, headlined by Michael Kimmelman, David Remnick, and George Packer, this significant anthology shows the city square in new light. Jehane Noujaim, award-winning filmmaker, takes the reader through her return to Tahrir Square during the 2011 protest; Rory Stewart, diplomat and author, chronicles a square in Kabul which has come and gone several times over five centuries; Ari Shavit describes the dramatic changes of central Tel Avivs Rabin Square; Rick Stengel, editor, author, and journalist, recounts the power of Mandelas choice of the Grand Parade, Cape Town, a huge market square to speak to the world right after his release from twenty-seven years in prison; while award-winning journalist Gillian Tett explores the concept of the virtual square in the age of social media. This collection is an important lesson in history, a portrait of the world we live in today, as well as an exercise in thinking about the future. Evocative and compelling, City Squares will change the way you walk through a city. Others recognize sites of major import: Pulitzer Prize winner Anne Applebaum contrasts two Cold War era landmarks, Moscows Red Square and Krakows Grand Market Square; while Evan Osnos reflects on the symbolic power of Beijings Tiananmen Square. Advance Praise for City Squares Public spaces are among the magical achievements of the human landscape. Entirely artificial, they make cities communities. They create a place where people are encouraged to gather, talk, eat, pray, govern, and mourn together. They change the character of cities and thus of civilizations.
