National Geographic Maps - Reference : Colorado [Laminated] (National Geographic Reference Map) before purchasing it in order to gage whether or not it would be worth my time, and all praised Colorado [Laminated] (National Geographic Reference Map):

2 of 2 people found the following review helpful. Great Looking Map - Handle with Care!By 999fineI really doubt anyone will be disappointed with the detail of this map. The topo, roads and markings are all quite detailed and tasteful. Great looking and very useful map. But the lamination is a bit on the thin side which will allow the map to develop dimples in the reflective surface if not handled carefully. I can see why people are not too happy with the way ships these, as it came to me rather unprotected in a box. Thankfully, UPS handled the box with enough care, but it could have easily turned out otherwise. Keep in mind this map is fairly shiny so reflections will be a placement factor.1 of 1 people found the following review helpful. The product was in good condition when I received it and looks excellentBy J. VogtThe product was in good condition when I received it and looks excellent. It is larger than you think, look at the dimensions carefully, its almost 4 feet wide. It has excellent detail, missing some land marks like the Flatirons, but I think it looks good overall.0 of 0 people found the following review helpful. Map fits the bill.By Bobbye-AnneThis map was exactly what I was looking for. I wanted a map that was large enough to frame for an empty wall in my family room and also had a lot of detail.

The spectacular topography of the Centennial State is expertly rendered on National Geographics wall map of Colorado. Part of the growing series of State Wall Maps, this map depicts Colorados diverse terrain and vegetation in remarkable detail. Mountain ranges, prominent peaks, major lakes, rivers, and reservoirs, and other geographic features are highlighted. In addition to hundreds of place names, this map includes the precise locations of cities, major roadways and railways, airports, military installations, federal and state parks, and protected areas. Prominent recreation features such as the Colorado Trail, Continental Divide Trail, and ski areas are also noted. This striking map would be an attractive addition to any study or office.The map is encapsulated in heavy-duty 1.6 mil laminate which

makes the paper much more durable and resistant to the swelling and shrinking caused by changes in humidity. Laminated maps can be framed without the need for glass, so the frames can be much lighter and less expensive. Map Scale = 1:705,645 Sheet Size = 40.5" x 30.25"

About the Author Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
