By Midwest Book Review Mark Pearson's *Colorado's Canyon Country: A Guide to Hiking Floating BLM Wildlands* is an absolutely gorgeous, full-color hiking guide filled with 51 easy-to-read maps, as well as photographs, survival tips, desert etiquette, and instructions for how you can help with wilderness issues. Each of the many suggested hikes is outlined on the maps and has its length listed, as well as its low and high elevations and its approximate difficulty. The paper used for printing is thick, durable stock, for this book is meant to be taken on the road. If you're planning a hiking trip to Colorado, get this book! 2 of 3 people found the following review helpful. Hiking Colorado BLM By A Customer Great guidebook! I have lived in Colorado for 36 years. What a treat to discover more places to hike, float, and camp in my own backyard! The maps and trail descriptions were just right. I also agree with Fielder and Pearson about protecting these areas from development and overuse by motorized vehicles.

From slick rock canyons to alpine wilderness, no scenery in the United States equals the diversity of Colorado's Bureau of Land Management (BLM) lands. From the world's second greatest accumulation of natural arches to towering 14,000-foot peaks, the number of places you never know existed will astonish you- and Mark Pearson has visited them all. His accurate directions and sensitive descriptions of canyon ecosystems make this book as necessary for your trip as a compass and a full bottle of water. This newly revised and expanded edition features a fresh look, more photographs, two additional wilderness areas, topographical maps and a special highlighted hikes feature.

About the Author Mark Pearson is vice president of the Wilderness Land Trust and has been active in Colorado wilderness issues with the Sierra Club and the Colorado Environmental Coalition for more than 15 years.
