Greg Breining : Compass American Guides : Minnesota before purchasing it in order to gage whether or not it would be worth my time, and all praised Compass American Guides : Minnesota:

2 of 2 people found the following review helpful. Good at what it sets out to do By Jessica Lux I got this book because it was one of the few available for the MN area. I was going to the Twin Cities, and I found the section on that area decidedly lacking in information. It had far less information than a standard AAA guidebook. The tradeoff is the rich history and the beautiful photography, which are what this book is touted for. I usually prefer more practical information such as prices, hours, time to allow for an attraction, guides to good shopping and dining areas, etc., and

this book did not deliver on those fronts. If you want an in-depth and beautifully done history, though, this book is a good choice. If you are a stranger to the area, you definitely have to pair this with a more practical guidebook (like AAA). I'm still looking for a good one for the Twin Cities area.

LANDSCAPE AND HISTORY
In Northern Minnesota, somewhere north of Hibbing in a forest of conifers and aspen near County Road 5, lies a spot at once prosaic and remarkable. Here, at a point unmarked and for practical purposes inexact, a falling raindrop has an equal chance of draining east through a maze of tributaries to the Great Lakes and the Atlantic Ocean, north to Hudson Bay, or south down the Mississippi to the Gulf of Mexico. Because of this confluence of major divides, historian William E. Lass calls Minnesota "mother of three seas." I've never heard the phrase elsewhere, even though I'm a life-long Minnesotan. But we'd do well to adopt it. It's a beautiful metaphor and symbolizes as well as anything the crossroads of geology, geography, landscapes, people, and cultures that make Minnesota the diverse state that it is today.

OVERVIEW
Minnesota's deep woods, thousands of lakes, picturesque farmland, and progressive cities attract visitors who want to enjoy a convivial urban environment or the state's natural beauty and -- secretly, perhaps -- to brave the extremes of its climate. Though it boasts no mountains, Minnesota stands as a subtle topographical divide, each region distinct.

Prairie Path of the Southwest and Red River Valley
Once a seemingly endless grassland roamed by bison and Dakotas on horseback; the Southwest is now Minnesota's richest farmland. Historic towns, monuments, and parks tell the tales of pioneers and their efforts to homestead on the prairie.

Southeastern Hills and Mississippi River
Passed over by the last ice age, southeastern Minnesota is carved by deep river valleys. Picturesque towns from the 1800s sit in the shadows of limestone bluffs. Quick waters provide trout fishing and pleasant canoe trips. Trails and country roads make for pleasant bike routes.

Minneapolis
Look to Minneapolis for its hustle and bustle, big business, and lively nightlife. Stroll the city's many lakeside parks or tour the remnants of its milling days. This is truly one of America's most "civilized" cities -- friendly, safe, and clean.

St. Paul
Born of the trade and exploration along the Mississippi River, Minneapolis and St. Paul grew up as rivals, each with its own character and sense of itself. Visit St. Paul, the state's capital, for historic sites such as the Landmark Center and the James J. Hill House, and for Victorian neighborhoods, intimate old bars, and ethnic restaurants.

St. Croix River Valley
Once the heart of Minnesota's white-pine logging industry, the St. Croix River Valley is today known for its natural beauty. The river was one of the nation's first designated wild and scenic rivers. Towns such as Stillwater and Taylors Falls are among the state's oldest and most picturesque.

North Shore and the Arrowhead
Lake Superior has a powerful presence. People visit the rugged North Shore for the crashing surf, tumultuous streams and waterfalls, and brilliant fall color. In the arrowhead-shaped tip of northeastern Minnesota lie the famous Boundary Waters Canoe Area Wilderness and the Mesabi Range, which provided the iron that built early 20th-century America.

Northern Reaches
This is bog country where the landscape consists of vast, wet flatlands. The Northwest Angle, the Northernmost point of the contiguous United States, juts into the enormous Lake of the Woods -- a sportsman's paradise.

Glacial Lakes
When Minnesotans want to get away they "go to the lake," often a cabin tucked away among central Minnesota's glacial hills and sparkling lakes. The region caters to folks on vacation, whether they fish, ride bikes, or play golf. Of historic interest is the headwaters of the Mississippi River.
