Janet Bristeir : Medical Tourism - Your Surgery Journey: A Journal of Your Experience before purchasing it in order to gage whether or not it would be worth my time, and all praised Medical Tourism - Your Surgery Journey: A Journal of Your Experience:

The expectation is that you will have read the previous books in this series, by Janet Bristeir; *Medical Tourism - Surgery for Sale!* and then worked through the *Medical Tourism - Your Pre-Surgery Checklist Workbook*. This will have aided you in your research of the country, facility and staff involved in your surgery, giving you a deeper understanding of the details we don't usually think about when we are told we need surgery. Now you've done your due diligence and are embarking on Your Surgery Journey. This journal will provide you with a structure to keep notes during Your Surgery Journey: details of travel arrangements, surgery, medications and post surgery follow-up that are required. All your notes will be in one convenient journal, a wealth of information for your follow-up care and recovery when you get home. The easy to follow format of the Journal guides you through the stages of Your Surgery Journey, prompting you to add your notes throughout the process. This will be an invaluable resource on your return from Your Surgery Journey.
