for years. still have it but its showing how much its been used. Love this map book. take it on road trips and especially camping. we like to go 4wheeling up north and randomly choose a campground using this map. also has interesting facts about every county. much better when the maps are separated by county instead of a grid. had a grid map before. it was hard to use. highly recommend this map book.0 of 0 people found the following review helpful.
