one author was the writer while the other was seriously interested in wine. Still this book is useful for people wanting to visit Minnesota wineries and learning more about cold climate wine making problems. It also addresses the comparative cost of wine from other than the top regions and suggests you support these efforts as the quality is improving. Having just returned from Spain, this is true all around the world where good wine is forcing out bad. It is not how it compares to a California or French wine but how serious an effort it is. 3 of 3 people found the following review helpful. Well Written and Researched By Charlene Torkelson Wonderful information about a growing Minnesota industry. Well written and researched! 3 of 3 people found the following review helpful. By Robert or Pat Ahrens I had such a wonderful opportunity to visit one of the wineries that they presented at, and they did an amazing job explaining how wine is made, and the families that cherish their occupation of making wine. Better yet is their book! It was well written, and a good resource for those who would like to check out some of the wineries within the state. Reading the book makes even the novice wine drinker, feel like they are they are somewhat educationally equipped to pick out the wine of their choice! Thank you for making this adventure more fun that it has already been. You two really make wine making, learning about the families and the wine, come to life! I am Minnesota proud. Best, Pat Ahrens

Minnesota Wineries provides an overview of the state's vibrant wine industry and features stories of winemaking and grape growing throughout the state. Individually and collectively, these stories incorporate strong family traditions, love of the art of winemaking and a passion to succeed in selling wines produced from grapes and fruits grown in a challenging and harsh climate. Minnesota Wineries offers a delightful and insightful read for hardy Minnesotans who want to expand their palates and their experiences by exploring local wineries.
