Grant Collier : Moab, Utah by Day Night before purchasing it in order to gage whether or not it would be worth my time, and all praised Moab, Utah by Day Night:

The landscape around Moab, Utah is of indescribable beauty. It contains a labyrinth of canyons carved out by the Green and Colorado Rivers and their tributaries. Sheltered within these canyons, or sitting high above, are an immense array of arches, balanced rocks, spires, and fins that have been sculpted out of sandstone. To the east of Moab rise the La Sal Mountains, which provide a stunning backdrop to the canyon country. Renowned photographer Grant Collier has captured images of the iconic spots around Moab, along with many remote and seldom-visited natural wonders. He has photographed the land through all of the changing seasons and has spent countless nights taking photographs beneath the moon, planets, and stars. He has also flown high above Moab to capture the scenery from a captivating new perspective. In the process, he has created a portrait of this amazing landscape unlike any that has been seen before.

Grant's sublime images of the area's indescribable beauty include the canyons of the Green and Colorado Rivers and an array of arches, spires, balanced rocks and fins that time and water have sculpted from sandstone. Collier is also a master of night photography, capturing images of formations against the starry skies of this amazing area. --Canyonlands Natural History Association Moab, Utah By Day Night is a compilation of impressively beautiful, flawlessly reproduced, full color, captioned images that are a delight and wonder to browse through. Grant Collier has a photographer's eye and uses his camera lens with all the skill and imagination an artist would with paint and canvas. --Midwest Book About the Author Grant Collier has been working as a professional photographer since 1996.
