Julian Smith : Moon Handbooks Virginia before purchasing it in order to gage whether or not it would be worth my time, and all praised Moon Handbooks Virginia:

0 of 0 people found the following review helpful. Five Stars By Gary A. Backlund Very useful! 0 of 0 people found the following review helpful. Five Stars By KATHLEEN PATTERSON helped us on our trip to virginia 1 of 1 people found the following review helpful. Moon Handbooks Virginia (Moon Handbooks) By Claire Edwards This book is fantastic if you need accurate and detailed information about this specific region. Well worth the money!

From the historical charm of Washington D.C. to a touch of the South in Richmond and a taste of the coast in Rehoboth, Moon Handbooks Virginia is the guide to the best the state has to offer, both on and off the beaten path.

Practical information includes suggested travel strategies and lists of must-see sights, plus essentials on dining, transportation, and accommodations for a range of budgets. Complete with details for enjoying food, bed-and-breakfasts, national parks, hikes, and campsites, Moon Handbooks Virginia gives travelers the tools they need to create a more personal and memorable experience.

"The latest in the batch of Moon Handbooks releases proves again that Moon is one of the finest travel series around. What sets Moon apart from most guidebooks is the attention to detail, and more importantly, a respect for the topic." About the Author Days after wrangling a degree in biology from the University of Virginia, Julian Smith found himself hopelessly entangled in a self-publishing venture that resulted nine months later in the one-pound, eight-ounce *On Your Own in El Salvador*, the first in-depth guide to the country. Moon Handbooks Ecuador came two years later. Since completing Moon Handbooks Virginia, he has contributed to *The Washington Post*, *National Geographic Traveler*, *Road Trip USA*, *Online Travel Planning for Dummies*, and other publications. He has somehow earned a Masters' degree in Wildlife Ecology in the meantime, eating smoked salmon and studying grizzly bears on the coast of British Columbia.
