Very good bookBy elgrecoAs an overview, you must credit the Moon series of travel/camping books; they are thorough and detailed in their analysis of places and surrounding environments. The descriptions are clear, effective and substantial enough to give one a good sense of the places and help guide one toward choose campsites more in line with the experience I want to have. The campgrounds are described very well and in enough detail that I feel more confident choosing good places to stay.1 of 2 people found the following review helpful.
