1 of 1 people found the following review helpful. InvaluableBy DreammooseWe've used the previous edition of this a LOT, traveling around the west. Unlike others we've looked at or tried, it includes all the wonderful, little Forest Service, County, and so on camping spots. An invaluable, amazing source. Bought this new edition just to be up to date. It lives in our little RV.0 of 0 people found the following review helpful. sort of like gift wrap tissueBy rstrontiThe pages are very thin, sort of like gift wrap tissue. There are a lot of important places that I would like to find but always seem to be in the fold of the page. For example Chino California isn't even on the map because it's in the fold of the pages and doesn't even recognize Highway 71. It seems like every time we wanted to go somewhere it was always in the fold of the pages and we couldn't locate that particular area.0 of 0 people found the following review helpful. Seems like some really good information is in the bookBy S. K. HopkinsMy daughter purchased this for us for our big trip this summer. Seems like some really good information is in the book. We're hoping we don't get any surprises when we go to make our reservations.
