Coming full circle..By KundeAlthough not a motorcyclist myself but an adventurer at heart, I have greatly enjoyed the first book and couldnt wait for the second read. As hoped, it didnt disappoint the Motorcycle Vagabonds take you again to places less travelled and through a vast range of emotions in their honest and humorous way of storytelling. I laughed, I had the creeps, I felt the despair, I felt the anger and the frustration and I shared the amazement of incredible places and encounters. In the end they even made me cry... For me personally the success or power of a book is not the complexity of words or structures, its all about the way it makes you feel and if the author has the skill to reach into the deepest corner of your heart. Something, the Motorcycle Vagabonds have successfully accomplished bravo!0 of 0 people found the following review helpful. WonderfullBy MarkAbsolutely amazing couple of books. The writing is top-notch and a real inspiration. I love that you included the reintegration phase as part of the book as well, as you mentioned so many travelers end their book with the end of the road but there is really so much more than that. It's something I've dealt with firsthand. Once you get a glimpse for what is out there you want more of it and returning to everyday life is so extremely difficult. Especially when you've seen small countries that do things so totally different from you and you absolutely love it. It changes you. Thanks for the read.

Expanding the Horizon! Part two of our journey around the world takes us to places off the beaten track through Southeast Asia, over the worlds highest passes to the stunning high altitude mountain scenery of the Himalayas and through sensitive countries such as Pakistan, Iran and Iraq. Striking a balance between the courage to stand up for our own beliefs and respect for other cultures and customs on the other hand is often frustratingly difficult. However, together with many other challenges it also determines our inner journey simultaneously. Many times the success of our world trip is at a tipping point and to grit our teeth and hold out becomes a familiar phrase. Among manifold insights into our life on the road, we also dont ignore the last major challenge: Our return and social-reintegration which consumes a lot of our strength and energy.

About the AuthorWho are the Motorcycle Vagabonds? Frank is the writer and Simone is the photographer of the team. Frank (born 1968) used to work in a suit and tie as a manager in charge of 50 people at a financial institution. Survived several nasty mergers, outsourcings and financial crisis until he understood that the latest disaster was a chance to change his life. Now he writes books and articles for magazines and is a well-known presenter for motorcycle travel themes. Simone (born 1974) was a florist in her former life and still is a passionate expert for plants. She has a big heart for animals. After our return from the atw-trip she wanted to do something more social and has become a nurse. Besides the social aspect, this profession has the advantage that there is a massive overdemand, which makes it easy to leave for a few months of Motorcycle Vagabond life and get a new job as soon as we are back home.
