Richard W. Miller : Mountain Directory East for Truckers, RV, and Motorhome Drivers before purchasing it in order to gage whether or not it would be worth my time, and all praised Mountain Directory East for Truckers, RV, and Motorhome Drivers:

0 of 0 people found the following review helpful. Mountain Directory East Mountain Directory WestBy NickWe tow a 30 ft. Airstream travel trailer on long trips across the country and have found the Mountain Directory West and the Mountain Directory East to be very valuable in planning our routes in mountainous country. Use of these publications allows one to keep away from, or prepare for, steep grades.0 of 0 people found the following review helpful. Five StarsBy Connie MannGreat book for RV'ers. Used the "western edition" last year out west.0 of 0 people found the following review helpful. too much info stacked into a little spaceBy ishant44a little difficult to merge with other maps. Confusing at times because it only shows sections of roadways along a route and most of them are not on primary roads

This book is a companion book to the above title. It gives locations and descriptions of over 300 mountain passes and steep grades in eleven eastern states.

From the Publisher We have been publishing the "Mountain Directory" books for nine years. Every time we reprint we add new pass and grade information and the original black and white maps have been replaced with very high quality color relief maps. Our phone number is in the front of the books and we offer a money back, no questions asked guarantee. After nine years, we are still waiting to make our first refund. We have also published a CD-ROM that includes both books. It is available at .About the Author Same as above.
