By ACTIONCAMFLIXI first saw this book in the travel book section waiting at my AAA office. I purchased two for my relatives who visit LA regularly and ordered this one off for myself. This is one of the best hidden places LA book I've ever seen. It is very complete and thorough. It has all pertinent information including hours of operation, maps, diagrams and some example photos. Of course it has all the popular tourist destinations but a lot more. I grew up in Los Angeles and discovered places I never even knew existed before seeing this book. Here are some examples : International Printing Museum in Carson, Centinela Adobe built in 1834, Salvation Army Museum in Palos Verdes, Jurassic Museum in Culver City. If you are a local like me you can visit new places every weekend you find in this book and not run out of places for many years. Where ever you live in LA you will discover new places to visit just a few minutes from your house. So this is the ultimate STAYCATION book!
